

Holmes Chapel Comprehensive School

Maths New York Experience

Monday 7th July – Friday 11th July 2025

Why New York?

Few destinations in the world could be more exciting than New York when taking pupils on a mathematics trip! From investigating the geometric cityscape to exploring the street grid system and considering the mathematical principles behind some of the world's most iconic buildings, a visit to New York will leave your pupils feeling inspired!

Home to a number of major financial institutions, an NST tour to this fascinating city will give your pupils an incomparable insight into the type of careers that are available in the world of mathematics, whilst also offering a fun learning experience.”

Itinerary (provisional)

Travelling by coach to London on Monday to catch a night flight to New York, we will then spend three full days exploring the city.

We will arrange a programme of visits to engage and excite students whilst there, the Federal Reserve Bank, The New York Hall of Science, The Museum of Maths and Wall Street as well as seeing the iconic sights.

Accommodation will be in the West Side YMCA which is a large hostel, room only, centrally located with recreational facilities available to use.

We will return on Friday, times to be confirmed.

Approx Cost £1800

There will be 40 places available and this trip is suitable for Years 9 - 13
