

# Family Discussion Cards

## Teacher Notes

This set of cards is designed to promote discussion about families. They aim to encourage students to think about what makes a family as well as to show them that family can mean different things to different people, and this should be respected.

You could print off a set of cards per small group and ask students to discuss them. Alternatively, you could print off just one set, distribute them around the whole class and then ask students to discuss the card they have been given in their small group.
